You're one step closer to taking an action that will help change the world – with eHub.

There are so many things you can do today to make a big difference for our future. eHub has resources and tools to help you take the guesswork out of going all-electric. Use your clean energy to power your entire home, car and appliances. Save money and protect the earth.

Hint: That gas isn't coming from your car.

You have the power to make
your home even healthier.

GreenStart & GreenPrime

Your energy choices. All customers are automatically enrolled in GreenStart – SVCE's competitively priced, clean electricity offering sourced from renewables and hydropower.

Be at the forefront of a 100% renewable energy future by upgrading to GreenPrime. This creates even more demand for electricity from renewable sources and costs less than \$5 more a month for most of our customers.

Whether you choose GreenStart or GreenPrime, the new time of use rates that all Californians will transition to, if you are not already on, can save you money and reduce your carbon footprint.

"We went with 100% renewable GreenPrime to power our all-electric appliances – a simple check of a box."

DEBBIE BYRON, LOS ALTOS

[UPGRADE TO GreenPrime >>](#)

It turns out clean energy matters. A lot.

Use of fossil fuels, such as gasoline, diesel and natural gas is responsible for more than 90% of man-made carbon emissions changing the climate here in Silicon Valley and worldwide. Cheap and clean renewable energy can replace fossil fuels used in your car and home. Use your clean electricity to make the switch!

COMBAT CLIMATE CHANGE

Buying clean electricity is an easy and essential first step in fighting climate change. Multiply your impact by replacing fossil fuels used in your car and home with clean electricity. 1

SAVE MONEY

SVCE's GreenStart clean electricity service is available to all customers and costs less than your investor-owned utility. Options such as rooftop solar may help you save even more. 1

TAKE CONTROL

Power your electric vehicle and high-efficiency home appliances with rooftop solar plus battery. If the rest of the block loses power, you'll be the one with the lights on.
